TEST PLAN

Action to Test	Test Procedure	Success Criteria
The program should be able to retain all data upon opening and closing the program	Open and close the program. Make sure that all the data are listed in the dropdowns. Go to quiz menu and ensure that questions are displayed.	All data is retained
The program should be able to import and parse files correctly	Import pdfs, and then make sure the dropdowns have the correct test titles and see if the correct questions are prompted for tests.	The test titles are correctly displayed under each subject. Each test contains the correct questions
The program should be able to prompt the correct questions based on the selected tests and have the correct answers	Go to quiz menu and compare the questions to the imported pdfs. Ensure that the question is from the correct tests and the data is correct.	The appropriate test is shown and the program displays the correct answers
The program should be able to export specific tests to .xlsx files to a desired directory.	Select a test and click export. Ensure that the file is saved in the correct location and contains correct data	The data is correct and the .xlsx file should be able to be imported into Kahoot.
The correct statistics should be shown on the MainMenu	Use the program and measure the time spent and questions missed	Correct statistics are displayed
